

# WNTC Looks Ahead With New Officers

At the general meeting of all personnel of the Campus Station WNTC, held on February 19, 1949, Herman Steinborn, Richard March and Jane Macomber were elected to the executive board as Station Manager, Assistant Station Manager and Secretary, respectively. At the same time Chester Kondel was elected to the position of Chairman of Publicity, and Charles Mueller to Chairman of Programming. Henry Carley, Chairman of the Business Committee, and Donald Dyne and Frank Frattali, Co-chairmen of Engineering, retained their positions. George Vosburgh, Robert Gardner, and Vaughn Weidel were chosen as members of the newly formed Co-ordination Committee, which will serve as an advisory board to the Programming Chairman. Their capacity is the equivalent of Assistant Chairmen.

Herman Steinborn, a Junior of the Mechanical Engineering Department at Clarkson College, comes from New York City. As assistant Station Manager during the past semester, he displayed his exceptional abilities and fine character which make him worthy of the position he now holds. Herm is well known around the campus for his various activities, being Vice-President of the Neutral Club, and a representative to the Board of Governors.

A native of New York City, Richard March is also a Junior in the Mechanical Engineering Department at Clarkson, and a member of the Neutral Club. Due to his high scholastic standing, he has been initiated into Tau Beta Pi honorary engineering society at Clarkson. In addition to being the Assistant Station Manager, Dick, an excellent organizer, holds executive positions as Literary Editor of the Clarksonian, Editor-in-Chief of the Frosh Bible, Sports Editor of the Clarkson Integrator, and Chairmanships of various class functions.

Jane Macomber, a sophomore student at State Teachers College, is a resident of Potsdam. She is a member of the Alpha Delta Sorority. Jane, a highly efficient girl with a pleasing personality, has served on the station since its opening.

Neutral's Chester Kondel of Buffalo is a Junior in the Mechanical Engineering Department at Clarkson. In addition to his present position, Chet is on the Junior Board of the Clarksonian, and is an active member of other campus organizations.

A second year Engineering student at Clarkson, Charles Mueller hails from Rochester, N. Y. Charley, a member of the Lambda Iota

## WNTC Looks Ahead

(Continued from page 1)

Fraternity, he is the President of the Sophomore Class, and displayed his executive ability recently, when he was chairman of the successful WNTC Booster Dance.

Milfred, New York is the home of Henry Carley, a senior Business Administration student at Clarkson. Hank has served WNTC's Business Committee in various capacities during the past year.

Don Dyne of Glen Rock, N. J., and Frank Frattali of Rochester are both Electrical Engineering students at Clarkson. Frank, a senior student, has been with the station since its beginning, while Don, a junior, joined the staff last September. These men have charge of the installation and care of the station's electrical equipment.

State Teacher's George Vosburgh of Castleton-On-Hudson, and Bob Gardner of Peekskill have previously served with the Radio Station as announcers, and thus, having gained a knowledge of program activities, are well qualified for their present position on the Advisory Co-ordination Committee.

Although a newcomer to the staff, Vaughn Weidel of New York City, possesses the necessary knowledge and qualifications that make him capable of handling the duties of the Co-ordination Committee. Vaughn, a sophomore in the Electrical Engineering Department at Clarkson, has the unusual distinction of having served on all four of WNTC's committees.

## Station Undergoes Major Changes

The return of Campus Station WNTC to the air for the Spring semester has been postponed indefinitely because of construction now going on in the studios. In rendering this decision, the Executive Board of the station felt that going on the air now, without construction completed, would only necessitate the cessation of operations in order to complete the station at some later date during the term.

Included in the present building is a new transmitter which is expected to better reception of the station. In addition, the large studio is being completed, and finishing touches are being added to the control room and the record library.

The Programming Department of the Campus Station plans to add several hours of broadcasting time when the station reopens. These will include a morning program, much the same as that presented during the Spring of 1948.
